

Chetan Allapur

+91-7619163392 | allapurchetan@gmail.com | Bengaluru, INDIA | Experience: 3+ Years | chetanallapur.web.app

Full-stack Software Engineer with 3+ years of experience, currently at UST Global. Proficient in JavaScript, React.js, Node.js, and MongoDB, with a proven track record of building scalable, user-focused applications using clean architecture and efficient data handling. Actively strengthening MERN stack and system design skills to transition into a senior React.js role. A quick learner with a passion for building innovative, impactful web and mobile solutions.

EDUCATION

B.E in Computer Science

Aug 2017 - Jul 2021

AGMR College of Engineering and Technology [VTU]

Grade: 8.0/10

SKILLS

Frontend: React.js, React Native, HTML5, CSS3, JavaScript (ES6+), TypeScript, Redux, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, Middleware, Authentication (JWT), Error Handling

Database: MongoDB, Mongoose

Testing & Tools: Jest, Selenium, WebDriverIO, GitHub, Postman, NPM, Yarn

Programming Languages: JavaScript, TypeScript, Core Java

WORK EXPERIENCE

Software Engineer - UST Global

Apr 2025 - Present

- Engineered responsive web and mobile applications using React.js, React Native, and Node.js, contributing to significant performance enhancements.
- Integrated RESTful APIs to enable seamless data flow and dynamic user experiences across platforms.
- Leveraged React Hooks and memoization to optimize performance, achieving a 25% reduction in load times.
- Collaborated with cross-functional Agile teams to launch new features and UI upgrades, improving user satisfaction.
- Partnered with the QA team to migrate test suites from Selenium to WebDriverIO, increasing automation efficiency by 40%.

Associate Software Engineer - Carelon Global Solutions

Nov 2021 - Mar 2025

- Collaborated with cross-functional teams to develop scalable and responsive web and mobile applications using React.js and React Native.
- Built user interfaces using the React library and React Native framework, ensuring adherence to design specifications and responsiveness across devices.
- Translated UI/UX designs into responsive, reusable components using React.js and modern styling libraries.
- Integrated backend services by developing and consuming RESTful APIs with Node.js and Express, enabling efficient data handling and seamless frontend-backend communication.
- Collaborated with the Quality Assurance (QA) team to identify, debug, and resolve critical application issues, ensuring high performance, cross-device compatibility, and enhanced user experience through systematic testing and continuous optimization.
- Actively identified and resolved bugs, improved performance, and ensured a smooth user experience through diligent debugging and clean code practices.

PROJECTS

Sydney Health Mobile application (Client: Elevance Health)

24 Months

- Built a cross-platform mobile app enabling secure healthcare access and real-time health data tracking.
- Developed features like authentication, appointment booking, and notifications.
- Streamlined state management using Redux and Context API.

Anthem.com (Client: Elevance Health)

16 Months

- Engineered backend APIs and database logic for secure healthcare operations.
- Improved performance via optimized MongoDB queries and Express middleware.

Multi-purpose Dynamic Face Recognition System

3 Months

- Created a Python-based project to implement live and video feed face recognition.
- Integrated an Android/iOS application for adding new individuals to the system.
- Developed a Serverless web application with administrative functionality to manage and delete person's details.

Admin Vault (Mobile Application)

1 Months

- Created a hybrid application using Ionic framework for seamless functionality on both Android and iOS platforms
- Integrated Firebase to capture, store, and manage images, ensuring efficient data handling and retrieval
- Implemented Firebase Authentication to guarantee secure data management.
- Facilitated seamless integration with a Python program for image processing and analysis.

Travel Log Book (Web Application)

2 Months

- Created a web-based Travel Log Book to demonstrate UI and frontend skills, while implementing backend functionalities to retrieve data from a database.
- Aimed to deliver extensive travel guidance for exploring diverse destinations across Karnataka.
- Utilized modern web technologies to develop an intuitive and user-friendly interface, enhancing the user experience for travel information seekers.

ACHIEVEMENTS

- **Winner – National-Level Hackathon** (*DEVELOPTHON – Code for Social Impact*), hosted at Deshpande Startups.
- Recognized as a **key contributor** in the current organization for impactful delivery and strong team collaboration.
