

Chetan Allapur

+91-7619163392 | allapurchetan@gmail.com | Bengaluru, INDIA | Experience: 4.5+ Years | chetanallapur.web.app
<https://github.com/ChetanAllapur>

React & React Native Developer with 4.5+ years of experience building scalable web and mobile applications using React.js, React Native, JavaScript, TypeScript, and Node.js. Experienced in developing responsive user interfaces, Integrating RESTful APIs, implementing state management solutions, and optimizing application performance. Proven track record of delivering healthcare and enterprise applications in Agile environments. Passionate about Building high-quality user experiences, writing maintainable code, and solving complex frontend challenges.

SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, Middleware, Authentication (JWT), Error Handling

Database: MongoDB, Mongoose

Testing & Tools: Git, GitHub, Postman, Jest, Selenium, WebDriverIO, NPM, Yarn

Concepts: State Management, Component Lifecycle, Responsive Design, Performance Optimization, Agile Scrum

AI-Assisted Development: GitHub Copilot, Cursor AI

WORK EXPERIENCE

Software Engineer - UST Global

Apr 2025 - Present

- Developed and maintained responsive web and mobile applications using React.js, React Native, JavaScript, and Node.js.
- Built reusable UI components and integrated RESTful APIs for scalable application features.
- Utilized React Hooks, state management techniques, and component optimization strategies to improve application performance and maintainability.
- Collaborated with cross-functional teams including product owners, designers, developers, and QA engineers in Agile environments to deliver production-ready solutions.
- Contributed to application quality improvements through debugging, code reviews, testing support, and performance optimization initiatives.
- Assisted in the migration of automation test suites from Selenium to WebDriverIO, improving test maintainability and execution efficiency.
- Leveraged GitHub Copilot and Cursor AI to assist with feature development, debugging, code refactoring, and technical documentation.

Associate Software Engineer - Carelon Global Solutions

Nov 2021 - Mar 2025

- Developed scalable web and mobile applications using React.js, React Native, JavaScript, and TypeScript for healthcare domain products.
- Built responsive and reusable UI components based on business requirements and UI/UX specifications.
- Implemented state management solutions using Redux and Context API to support scalable frontend architecture.
- Integrated RESTful APIs and collaborated with backend services built using Node.js and Express.js to ensure seamless data flow.
- Participated in feature development, bug fixing, performance improvements, and production support activities across multiple releases.
- Collaborated with QA, product, and development teams to resolve issues and improve application stability.
- Followed Agile methodologies and actively contributed to sprint planning, code reviews, and releases.

PROJECTS

Sydney Health Mobile application (Client: Elevance Health)

24 Months

- Developed and maintained a React Native healthcare application enabling members to access healthcare services and health-related information.
- Implemented mobile features including authentication workflows, appointment-related functionality, notifications, and REST API integrations.
- Utilized Redux and Context API to support scalable state management and maintain application performance.

Anthem.com (Client: Elevance Health)

16 Months

- Developed and maintained backend APIs using Node.js, Express.js, and MongoDB for healthcare-related applications.
- Optimized database queries and middleware to improve application performance and data processing efficiency.

Multi-purpose Dynamic Face Recognition System

3 Months

- Developed a Python-based face recognition system capable of identifying individuals from live camera streams and recorded video feeds.
- Integrated Android and iOS applications to register new users and synchronize facial data with the recognition system.
- Designed and implemented a serverless web application for managing user records, facial data, and administrative operations.
- Utilized computer vision and image-processing techniques to improve recognition accuracy and support real-time identification workflows.

Home Ledger (Mobile Application)

2 Months

- Designed and developed a household expense and inventory tracking application focused on recurring purchases and monthly budgeting.
- Implemented features for expense categorization, recurring item management, and summary-based financial insights.
- Built using React Native and Firebase with emphasis on scalability, structured data management, and user-friendly design.

EDUCATION

B.E in Computer Science

Aug 2017 - Jul 2021

AGMR College of Engineering and Technology [VTU]

Grade: 8.0/10

ACHIEVEMENTS

- **Winner – National-Level Hackathon** (*DEVELOPTHON – Code for Social Impact*), hosted at Deshpande Startups.
- Recognized as a **key contributor** in the current organization for impactful delivery and strong team collaboration.
